I am co-author of more than 500 scientific publications, in large part as member of the CMS Collaboration (2009 – present). For the latter, I am listing below those for which I gave the most important contribution by authoring at least one related internal note. A complete list of my publications can be found at [inspirehep.net/author/L.Bianchini.1](https://inspirehep.net/author/L.Bianchini.1)
